Cognitive science is the interdisciplinary research field that seeks to understand the nature of the human and other minds, in all its implications. Related disciplines include Psychology, Neuroscience, Philosophy, Artificial Intelligence, Linguistics, Anthropology, and Education. We invite **all students and researchers** interested in cognitive science to ISBCS 2014.

Participation is free of charge, but requires registration from the website.

Keynotes

- **Gary Cottrell** (UCSD), Solving the visual expertise mystery: Why is the fusiform face area recruited for other domains of expertise?
- **Erol Başar** (Istanbul Kültür University), CLAIR: A Dynamic Model to Extend (Replace) the Concept of Brodman Areas

Invited Talks

- **Kourken Michealian** (Bilkent University), Episodic memory in evolutionary perspective
- **Deniz Yüret** (Koç University), Learning and disambiguating word categories
- **Reşit Canbeyli** (Boğaziçi University), When Time and Light Interact: Rhythms of Life and Death
- **Deniz Zeyrek** (METU), Turkish Discourse Bank, Discourse, Discourse Structure

Panel Discussion
